We care for Historic Buildings

The key to using historic buildings is to understand them. Archaeology South-East has developed unrivalled skills in understanding and interpreting historic buildings. We offer many kinds of survey, from a rapid assessment to a detailed record.

Why work with Archaeology South-East?

Buildings are a vital source of information about the past. Recording helps us to understand the importance of a building, and provides a basis from which informed decisions can be made about its future.

Many of our clients are owners of historic properties, interested in understanding more about their homes. Local planning authorities may require an assessment to be submitted with an application for works (following Planning Policy Guidance). Information is also needed when applying for grant funding and in conservation management plans.

This is where we help: we liaise with architects, builders and conservation officers to inform the design process, smoothing the path in applications for consent.

Archaeology South-East also offers a cost-effective integrated service combining building recording with below-ground archaeology.

Services

- Interpretative surveys
- Evaluations and impact assessments
- Archaeological recording
- Mitigation strategies
- Research and historical analysis
- Assessment of age and significance of buildings and features

Our Expertise

Archaeology South-East has a large team of building archaeologists, expert in a wide variety of structures: from Second World War air raid shelters to country house estates.

The Senior Buildings Officer is David Martin FSA, IHBC, MIFA. David is a Research Fellow of University College London with over 30 years experience in studying historic buildings. He has published many books on the subject.

Our building archaeologists are supported by professional surveyors and illustrators, and work alongside specialists in local history, field archaeology, environmental impact assessment, and site management and interpretation.

Clients

Archaeology South-East works with English Heritage, the National Trust, county and district councils, development companies, architects, and numerous private owners.
